

TABU Recordings are proud to present the label's new world wide signing:

It's with great pride we announce that the most promising and upcoming band in the Norwegian metal scene, WINDIR, has signed a recording contract with TABU Recordings.

Hailing from the land of the fjords, WINDIR's sound and music is as dramatic & violent as the band's origin, Sogndal. After four albums on the Norwegian label Head Not Found, WINDIR decided to take the band to the next level and signed a deal with TABU Recordings.

Their latest masterpiece, «Likferd»(HNF), received great reviews and was awarded as Album Of The Month with 6/6 points in SCREAM MAGAZINE.

WINDIR is highly acclaimed as a live band, and has done Norwegian festivals like the INFERNO, QUART and HOLE IN THE SKY with great success. In July this year WINDIR did their first US shows playing at the MILWAUKEE METAL FEST, where they were co-headlining with acts such as Enslaved, SYL, M.O.D, Nuclear Assault and Ice-T/Bodycount. These shows were followed by a very successful Headlining Norwegian tour in the autumn. The tour included headlining shows at both Mosh Fest and the 1001 Watt festival.

Both WINDIR and the label are pleased with the deal, and the band are working like hell with new material at the moment. The first album on TABU REC will be recorded in ABYSS STUDIO over a 4 week period in May-July 2004, and is scheduled for release in October the same year.
